

Your World, Your Money

A GLOBAL THINKING FOUNDATION USA PODCAST

Blockchain Revolution:

- With over 30 years of experience in emerging markets, Segre acknowledges the edge cryptocurrencies have in speculation and inflation. However, she sees the true value of cryptocurrency in the advancement of blockchain technology.
- New currencies developed by central banks worldwide (CBDC) are heralding a new phase of experimental digital currency, allowing blockchain tech to expand and explore new use-value in the financial sector - particularly on the Internet.

Cryptocurrency and Climate Change:

- Though the blockchain revolution is well underway, it's important to confront the environmental impact of actions such as BitCoin mining, whose overall revenue consumes the amount of energy comparable to a medium-sized nation.
- At the recent COP26 in Glasgow, over 40% of the finance world spanning 45 countries agreed to respect the Paris Agreement, committing 133 million assets to cut carbon emissions.
- Cryptocurrency overall must reform with sustainable solutions to support climate agendas aiming to prevent global temperatures from rising above 1.5 degrees. This initiative is essential to avoid planet-wide natural disasters en-masse.

There Is No Planet B:

- Global Thinking Foundation's 2021 annual event, Sustainability and Technology For the Regeneration of Ecosystems, will unveil a far-reaching 2030 agenda, continuing GLT's mission to utilize technology and reform our current system to better suit the needs of the new labor market.
- As well, preparing the new generation for the necessity of The Green New Deal, follow the event's projects, findings, and speeches from various speakers - including Claudia - at our website www.globalthinkingfoundationusa.com

Season 3, Episode 06: Crypto and Climate, A Look To The Future with GLT Founder & President, Claudia Segre

Guest: Claudia Segre, founder and president of Global Thinking Foundation
